Single Sign-On Session Transfer

What is it about?
Actually, a SSO session is bound to one device and browser. If a user has different devices it could be useful to transfer a strong authenticated session to another device. In this project a concept to transfer session information should be developed and implemented.

Goals?
» Analyze possible solutions for SSO session transfer
» Implementation of a prototype to transfer a SSO session to a smartphone

Skills?
» Basic knowledge of HTML5 and session management
» Scientific methods
» Interest in the development and implementation of new concepts
