

Wanna hack? infosec needs You!

Motivation

LosFuzzys is a **team** of people enthusiastic about *information security (infosec)*, which regularly participates in infosec competitions which happen in an international context, so called *capture-the-flag challenges (CTFs)*.

We love to **solve challenges together**, and CTFs provide a great way of practicing infosec-related skills as a team in a legal environment. CTFs are **collaborative & competitive** at the same time and, most importantly, they are **fun** 😊

For these CTFs, we use **many tools**. Some of those tools are also useful in a broader infosec context. We want to give students (= **You?** 😊) the opportunity to deepen their knowledge, by allowing them to come up with a **topic of their own**. *Wanna take a closer look at a certain topic?*

LosFuzzys **welcomes people with different skill levels**: a curious beginner is as much welcome as an experienced person. We also embrace various skill sets and diverse backgrounds. *Let's Dig Deeper into infosec Together!*

Goals and Tasks

- > Talk to us about your idea/concept
- > Together we will *find a mentor* for your topic
- > *Refine & implement* your idea/concept
- > *Deliver & present* your results

LosFuzzys **BBQ 2019**

Literature

- > LosFuzzys Website

- > S. More and M. Rodler
A CTF Hackers Toolbox
[Grazer Linuxtage 2016](#)

Courses & Deliverables

- Introduction to Scientific Working**
Short report on background
Short presentation
- Bachelor Project**
Project code and documentation
- Bachelor's Thesis**
Project code
Thesis
Final presentation

Recommended if you're studying

- CS
- ICE
- SEM

Prerequisites

- > Experience with an infosec tool ...
- > ... and YOUR IDEA how to improve it
- > Curiosity & motivation
